Nanodegree Program
Project: Crafting an Analytic Brief

Business Story

What relevant actionable segments exists?

- People who are considering buying their first electric vehicle
- Environmentally conscious consumers
- Tech-interested drivers
- Urban commuters with access to charging
- Small business or fleet buyers

Which ones should we pursue and why?

- Focus on first-time EV buyers and urban commuters, because these groups are most likely to adopt electric vehicles and benefit from the Model 3's cost and convenience.

Customer Story

Where is our target audience?

- Urban areas with charging infrastructure
- Online through search engines, YouTube, and the Tesla website
- Tesla showrooms

Where is our effort?

- Website and online product pages
- Showrooms and test drives
- Media coverage and word-of-mouth

How effective is our effort?

- Strong awareness and high interest in Tesla
- Some drop-off between configuring a car and completing a purchase

Where should we focus changes?

- Provide clearer information about financing and incentives
- Improve education about charging and total cost of ownership

What should we do, now or later?

- Now: improve website tools and messaging about pricing and charging

Testing and Learning Plan

What should we study further?

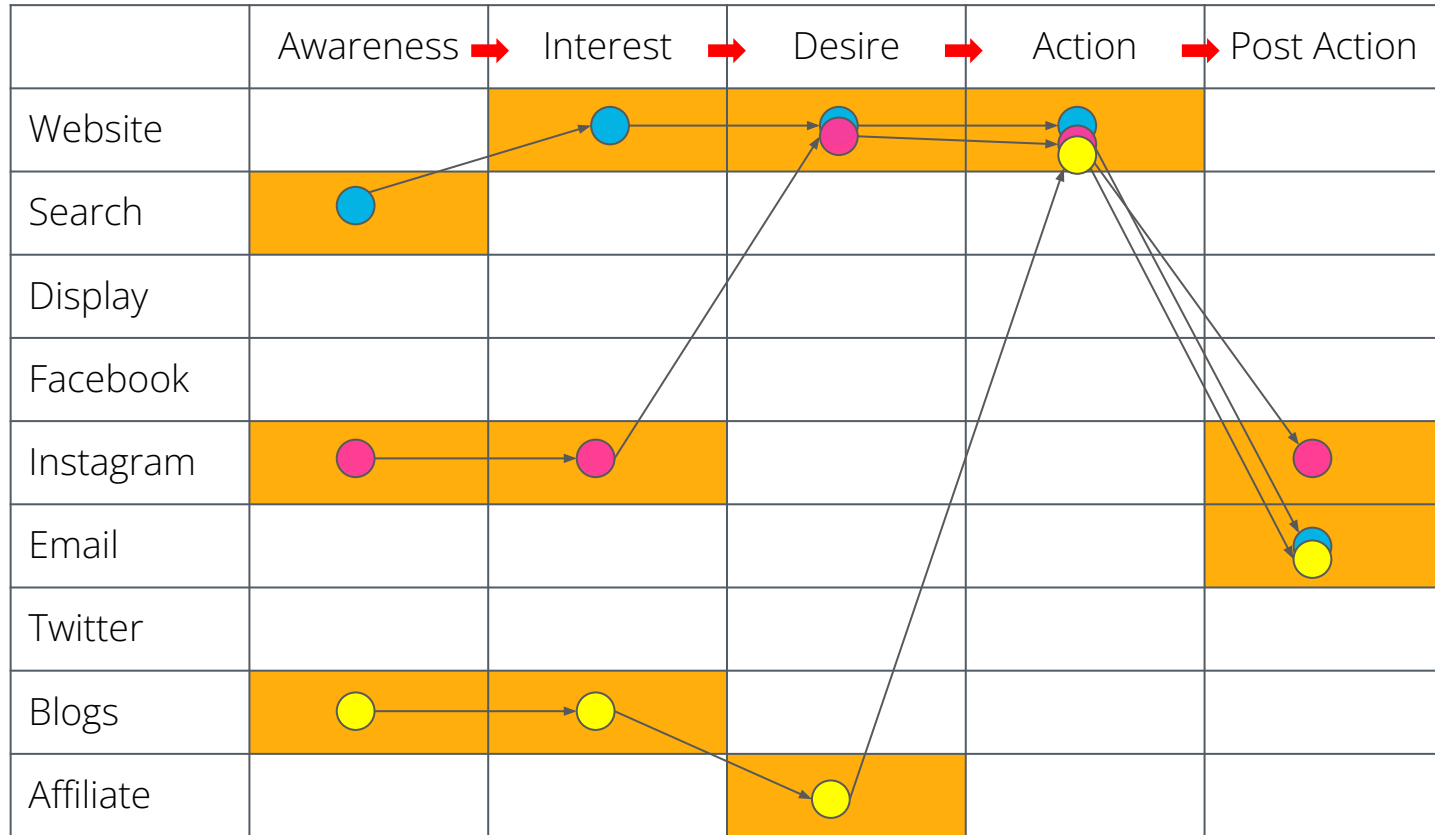

- Why users do not complete the purchase after configuring a car
- Which concerns (price, charging, timing) prevent conversion

What should we try?

- Test different website messages about financing
- Test different ways of explaining charging
- Try reminder emails for users who abandon configuration

Purchase Process

Channels

Most Important Metrics — Purchase Process

1. Awareness

- Search impressions for EV and Model 3 keywords
- Website visits to the Model 3 page
- Social media impressions

2. Interest

- Time on site on Model 3 pages
- Configurator starts
- Engagement on social posts

3. Desire

- Repeat visits to the site
- Configurator completions
- Requests for test drives or more information

4. Action

- Online orders placed
- Test drive bookings that lead to orders

5. Post Action

- Engagement after purchase (emails opened, app usage)
- Referrals or social mentions

Testing and Learning Plan

What analysis and data do we need?

- Funnel conversion rates (visit → configure → order)
- Drop-off points in the configurator
- Survey data on customer concerns
- Geographic performance by city or region
